Further Recurrence Of A Tumor Of The Mamilla (Nipple) Which Had Recurred 9 Times After Surgery And Had Progressed Towards Malignancy

Prevention Through The Issels Treatment Of Further Recurrence Of A Tumor Of The Mamilla (Nipple) Which Had Recurred 9 Times After Surgery And Had Progressed Towards Malignancy

Patient E.D., Born 1931, file No. 203/55.

40 years no recurrence, patient leading a healthy normal life

TREATMENT HISTORY [First Diagnosis](#) | [Standard Treatment](#) | [Issels Treatment](#)

First Diagnosis

1948

Papilloma of right nipple (Dr. Roemer, Trier), surgery
First local recurrence (Dr. Roemer, Trier), surgery

Standard / Conventional Treatment

1949

Second local recurrence (Dr. Roemer, Trier), surgery
Third local recurrence (Dr. Bauknecht, Trier), surgery

Histology, including 3rd recurrence : No evidence of malignancy

Fourth local recurrence (Dr. Bauknecht, Trier), suspicion of Paget's disease (Dr. Bauknecht, Dr. Jacobs, Trier), surgery

Issels Immuno-Oncology

1950

Fifth local recurrence, suspicion of Paget's disease (Prof. Bruehl, Trier, Prof. von Kennel, University of Cologne), surgery

1952

Sixth local recurrence (same physicians), surgery

Beginning Paget's disease-like tissue metamorphosis. (Dr. Berres, Cologne)

1953

Seventh local recurrence (same physicians), surgery

1954

Eighth local recurrence (Dr. Schmuck, Dr. Geiger, Dr. Haaf, Trier), **Surgery, Radiation, Chemotherapy.**

Suggested amputation of both breasts refused by patient.

Issels Treatment

August 1955

Admission to Dr. Issels' hospital, with ninth recurrence.

Findings on admission by independent specialists: Pedicled cauliflower- shaped papilloma of the right nipple. Excision.

Histological findings of various sections of the tumor sent to different pathologists:

Possibly Paget's cancer (Prof. Singer, Munich) Locally malignant basalioma (Prof. Hueck, Munich) Probably local malignancy (Prof. Gloggeniesser, Munich) Hidradenoma, malignancy in question.

August to October 1955

Ten weeks of Issels Treatment (comprehensive immunotherapy)

With this follow-up treatment after surgical removal of the ninth recurrence, further recurrence and a mutilating surgery could be prevented, as well as the progressive transition into malignancy.

Issels Immuno-Oncology

Follow-up

1961

Patient got married and became the mother of 2 healthy children.

Observation until 1995

40 years no recurrence, patient leading a healthy normal life
