TREATMENT HISTORY [First Diagnosis](#) | [Issels Treatment](#)
[First Diagnosis](#)

June 1957

Diagnosis: Cancer of the Right Ovary.

Histology: Undifferentiated solid carcinoma ... very malignant. Path. Inst. University of Munich/Germany. Carcinoma of the ovary, tumor tissue extends to the border section of the uterine tube. Path. Inst. University Ljubliana.

Treatment: Resection of the right ovary and uterine tube. Macroscopic examination shows tumor tissue at the border section of the uterine tube.

As margins were not clear surgery and radiation were recommended. Because of her desire to have children patient refused.

No Standard Treatment.

[Issels Treatment](#)
