

Issels Immuno-Oncology

Recurring Highly Malignant Advanced Carcinoma of the Cervix

Complete Long Term Remission of a Recurring Highly Malignant Advanced Carcinoma of the Cervix through the Immunobiological Issels Treatment without any further Standard Treatment

Patient K. B., Born 1898, File 236/55

11 years cancer free without any recurrence, patient leading normal healthy life.

TREATMENT HISTORY [First Diagnosis](#) | [Standard Treatment](#) | [Issels Treatment](#)
[First Diagnosis](#)

January 1955

Diagnosis: Carcinoma of the Cervix Stage II.

Histology: Tubular adenomatous and adenopappilar carcinoma with high degree of malignancy. Pathol. Instit. Bremen, and Path. Inst. Munich.

[Standard / Conventional Treatment](#)

February to April 1955

Treatment: Radium Implant and Radiation Therapy.

July 1955

Recurrence.

September 1955

Findings by Gyn. Oncol. Institute of the City of Bremen: The right parametrium, the uterosacral ligament included, are fan-like infiltrated. Because of large spread, surgery not possible, radiation exhausted.

No further standard treatment possible. Patient considered incurable.

[Issels Treatment](#)

End of September to December 1955

Issels Treatment: 12 weeks of in-patient treatment at the Issels hospital with 8 months of out-patient follow-up treatment.

Issels Immuno-Oncology

August 1956

Issels Treatment: 4 weeks of in-patient treatment at the Issels hospital with 6 months of follow-up home program.

1956/57

Gradual remission.

February 1958

Issels Treatment: 4 weeks in-patient with 6 months follow-up home program.

June 1960

**Independent Findings by Gyncol. Oncol. Institute of the City of Bremen:
Complete remission. Discharge from Observation**

Follow-up until 1971

11 years cancer free without any recurrence, patient leading normal healthy life.

DISCLAIMER: No claim is made that patients with similar diagnosis and/or treatment(s) will respond to the same extent as the patients shown. All testimonials have been provided voluntarily to share a patient's experience with the Issels Treatment and their state of health at the time. Some patients may have passed away due to age or disease. None of these patients received compensation or are related to the Issels Treatment Centers.
